FOSTERING CLIMATE FINANCE FOR SUSTAINABLE FUTURE

Thursday, 21st November 2019

Hilton Colombo Residencies

8:30 AM – 4:30 PM

The National Consultation on Innovative Climate Finance Mechanisms for Financial Institutions in Sri Lanka tries to bring together policymakers, private business and financial sectors, international organization, and other relevant stakeholders to discuss pressing issues in promoting climate-resilient investment from the private sector. The national consultation will be a platform to gather feedback on the project champion driven by ICC Sri Lanka together with UN ESCAP to establish next modalities in fostering climate finance for sustainable future.

The key objective of the regional event is to strengthen implementation of the 2030 Agenda for SDGs in Sri Lanka, by bringing together national and subnational governmental, multilateral, bilateral and civil society partners to:

- A. Develop a common understanding of the latest trends, successes and challenges with mainstreaming and integrating climate change in governance processes;
- B. Identify best practice for mainstreaming, accessing and leveraging finance for climate change and delivering on the SDGs with a focus on gender equality (SDG 5) and poverty (SDG 1);
- C. Raise awareness about climate and sustainable finance and strengthen capacity of stakeholders to develop an enabling policy environment that promotes private investment in climate change mitigation and adaptation projects.
- D. Promote the project champion on climate finance and gathering feedback from stakeholders on fostering climate finance for sustainable future.
